Youness Safouani

DATA ANALYST | SQL | POWER BI | PYTHON

Montreal, Quebec | youness.analyses@gmail.com | GitHub | LinkedIn

PROFESSIONAL PROFILE

Bilingual data analyst specializing in SQL, Power BI, Python and Excel. More than 7 years of experience analyzing operational information, validating data, investigating anomalies and communicating results in the telecommunications sector. Skilled at turning raw data into indicators, reports and recommendations that support decisions.

DATA ANALYTICS EXPERTISE

SQL	Joins, CTEs, subqueries, aggregations, window functions, views and consistency checks
Power BI	Power Query, DAX, relational modelling, measures, KPIs, filters and dashboards
Python	Pandas, NumPy, cleaning, exploration, transformation, automation and predictive models
Excel	Pivot tables, lookups, formulas, reconciliations, controls and data preparation
Data quality	Profiling, validation, anomaly detection, traceability, documentation and control rules

RELEVANT DATA ANALYTICS EXPERIENCE

Operational Data Analysis - Telecommunications

Quebecor Inc. and subsidiaries | Montreal, Quebec | Oct. 2018 - 2026
Official title: Service Technician - Telecommunications and Technical Support

- Collected and structured data from service records, diagnostics, tests and technical interventions.
- Verified the accuracy, completeness and consistency of information before use or escalation.
- Analyzed incident histories to identify likely causes, anomalies and recurring problems.
- Compared diagnostic results and grouped observations to identify operational trends.
- Turned dispersed technical information into structured summaries that supported follow-up and decisions.
- Documented results, controls performed and recommended actions to maintain traceable records.
- Communicated findings to users and technical teams in clear, solution-oriented language.

Technical Data Analysis - Internet Services

Bell Canada | Montreal, Quebec | May 2013 - Oct. 2018
Official title: Technical Support Technician - Telecommunications

- Collected, verified and interpreted diagnostic data for Internet, Wi-Fi and connected-device services.
- Analyzed test results to detect variances, isolate causes and prioritize corrective actions.
- Cross-referenced tracking-system information and technical observations to confirm conclusions.
- Maintained structured and complete records to support continuity of analysis and interventions.
- Summarized results and explained conclusions to clients and internal teams.

HANDS-ON EXPERIENCE - SQL, POWER BI AND PYTHON

Data Analyst - Independent and Academic Work

Montreal, Quebec | 2025 - 2026

- Cleaned, standardized and validated datasets with SQL, Python, Pandas and Excel before analysis.
- Wrote SQL queries using joins, CTEs, aggregations and window functions to produce reliable indicators.
- Built data models and Power BI dashboards with Power Query, DAX, measures and KPIs.
- Performed exploratory analysis to identify trends, segments, outliers and relationships between variables.
- Analyzed telecommunications customer churn and developed a predictive model with business recommendations.
- Automated data preparation, validation and export steps using Python and Excel.
- Designed ETL/ELT data flows and documented transformations, dependencies and quality controls.
- Developed a local solution to classify, extract, verify and export confidential financial data.

TOOLS AND METHODS

Visualization and BI	Power BI Desktop, Power Query, DAX, KPIs, interactive reports and data storytelling
Databases	PostgreSQL, MySQL, SQLite, Snowflake, MongoDB and analytical query design
Processing	Python, Pandas, NumPy, Excel, CSV, ETL/ELT, Spark and Kafka
Analytics	Descriptive statistics, segmentation, classification, regression and trend analysis
Governance	Quality, validation rules, reconciliation, documentation, traceability and confidentiality

EDUCATION AND CERTIFICATION

AEC - Big Data Development (LEA.C0)

Collège de Bois-de-Boulogne, Montreal | 2025 - 2026

SQL, Power BI, Python, statistics, visualization, ETL/ELT, Spark, Kafka, Snowflake and cloud computing.

IBM Data Analyst Professional Certificate

IBM SkillsBuild

Data analysis, Excel, SQL, Python, visualization, dashboards and communication of results.

STRENGTHS AND LANGUAGES

Analytical rigour | Problem solving | Autonomy | Documentation | Collaboration | Customer focus
