Youness Safouani

DATA ANALYST | SQL | POWER BI | BUSINESS ANALYTICS

Montreal, Quebec | youness.analyses@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL PROFILE

Bilingual data analyst focused on SQL, Power BI and data preparation. After several years in IT and telecommunications, I chose to bring my hands-on experience into analytics. I clean and verify data, build useful indicators and present results in a format that helps teams act.

SPECIALIZED SKILLS

Power BI	Power BI Desktop, Power Query, DAX, relational modelling, measures, KPIs, filters, slicers and interactive reports
SQL	Joins, CTEs, subqueries, aggregations, window functions, views, cleaning and validation
Python and Excel	Python, Pandas, NumPy, Excel and CSV for exploration, transformation, validation and automation
Analytics	Profiling, data quality, segmentation, trends, classification, regression and concise findings
Data and pipelines	ETL/ELT, PostgreSQL, MySQL, SQLite, Snowflake, MongoDB, Spark and Kafka

APPLIED DATA ANALYTICS EXPERIENCE

Data Analyst - Applied Projects

Independent and academic projects | Montreal, Quebec | 2025 - Present

- Cleaned and validated data with SQL, Python and Excel before analysis.
- Built Power BI dashboards with Power Query, DAX and performance indicators.
- Explored telecom data and developed a customer churn prediction model.
- Designed data pipelines and documented quality controls.
- Developed ComptaPrivée AI to classify, extract and validate financial data.

SELECTED PROJECTS

Telecom Customer Churn

SQL, Power BI, Python and Pandas - data preparation, risk segmentation, KPIs and predictive modelling. View project

ComptaPrivée AI

Python, SQLite, Excel and CSV - document classification, structured extraction, consistency checks and review-ready exports.

BI Analytics Pipeline

Kafka, Spark, Snowflake, MongoDB and Power BI - ingestion, transformation, quality controls and indicator preparation.

PROFESSIONAL EXPERIENCE

Service Technician - Telecommunications and Technical Support

Quebecor Inc. and subsidiaries | Montreal, Quebec | Oct. 2018 - 2026

- Reviewed service records and diagnostic results to determine the likely cause of an incident.
- Checked the consistency of recorded information before follow-up or escalation.
- Documented technical results in a structured format to maintain a reliable history.
- Identified recurring issues and communicated findings to users and the teams involved.

Technical Support Technician - Telecommunications

Bell Canada | Montreal, Quebec | May 2013 - Oct. 2018

- Collected and interpreted diagnostic data for Internet, Wi-Fi and connected-device services.
- Compared test results to identify anomalies and isolate the source of an issue.
- Recorded interventions and outcomes to support clear follow-up through resolution.
- Explained technical conclusions in language users could understand.

EDUCATION

AEC - Big Data Development (LEA.C0)

Collège de Bois-de-Boulogne, Montreal | May 2025 - Dec. 2026

A 750-hour program covering SQL, Power BI, Power Query, DAX, Python, statistics, visualization, ETL/ELT, databases, Spark, Kafka, Snowflake and cloud computing.

CERTIFICATION

IBM Data Analyst Professional Certificate

11-course program - IBM SkillsBuild

Data analysis, Excel, SQL, Python, visualization, dashboards and communicating results.

PROFESSIONAL STRENGTHS

Analytical rigour | Autonomy | Bilingual communication | Collaboration | Customer focus | Adaptability
